

NOTES:

The navigation is set to a scrolling effect. So when a user clicks on the link the page scrolls down to the appropriate area. The whole site is all on one long page. Very modern and slick.

There are two options here:

1: Is a coverflow of images which highlight what the business does.

2: Is a video background that highlights what the business

A very simple over-view of the team. Very graphic and visually impactful. Very little use of text here. The circles and dates highlight companies worked for in the past and job roles.

Visuals representing the companies main areas of focus in a clear, concise and visual way. When clicked on more information about each topic will present itself (in modal form).

Again a simple and visually appealing contact form and map to the office.
